

Mobile Device Management (MDM) Solutions

Keep your business devices safe
and in your control

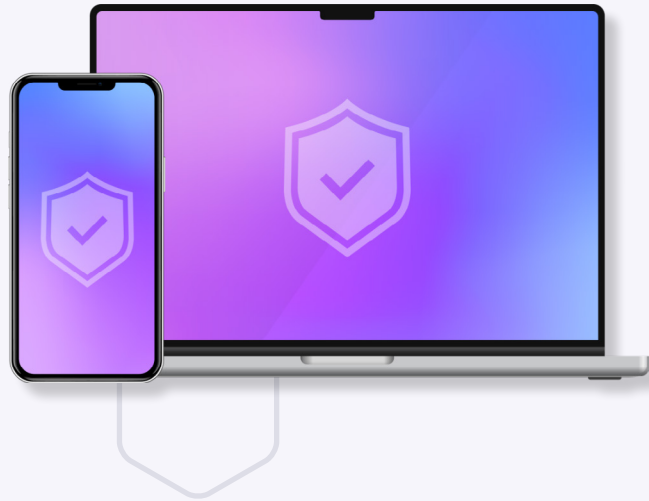

A large, dark smartphone is positioned diagonally across the lower half of the image. The screen displays a large, light-colored padlock icon, symbolizing security. The background of the entire image is a deep purple with a subtle, abstract pattern of light-colored lines and dots, suggesting a digital or network environment.

Leaders in business communications

About Alfonica

At Alfonica, we believe that technology should support your growth, not slow you down. Based in the UK, we specialise in helping businesses navigate the complexities of futureproof connectivity, telecoms, and security.

Our mission is to provide straightforward, reliable business communication solutions that keep your team moving. We understand that every business is different, which is why we focus on tools that are easy to use and even easier to manage like mobile device management.

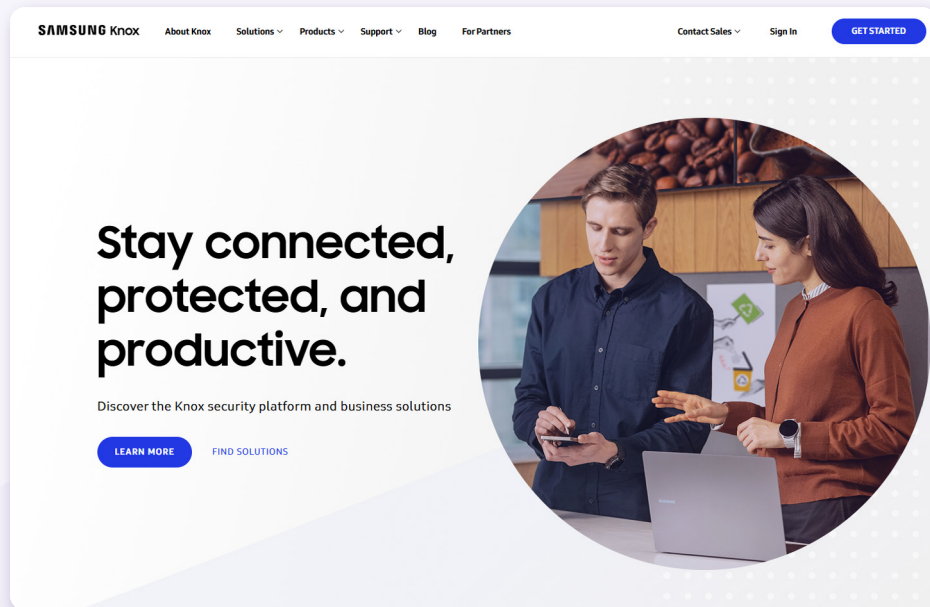

Why Alfonica MDM?

Alfonica MDM is a management tool designed to put you back in control of your mobile devices. It allows you to manage every smartphone, tablet, and laptop from one central location, ensuring your business data stays safe while your team stays productive even if working during a commute or on-site premises.

Protect & Simplify Your Workday

Our systems give you a full view of all your registered devices on one single screen, allowing you to handle the technical side of things with just a few clicks.

✓ Quick Device Setup

When you have a new starter, you can get their phone or laptop ready in minutes. They'll have all the apps and security they need the moment they turn it on.

✓ Worry-Free Security

We set up automatic rules like requiring strong passwords, so you don't have to check every device individually. It's security that looks after itself.

✓ Easy App Management

Need to update a work app for everyone? You can send it out to every device at once. No more asking staff to "please remember to update".

Complete Hardware Support for iOS & Android Devices

With Alfonica MDM, you stay in the driver's seat even if a device goes missing. Losing a device is stressful, but it doesn't have to be a disaster.

✓ Lock & Wipe Remotely

If a phone is lost or stolen, you can lock it instantly from your dashboard. If it's gone for good, you can wipe all the business data remotely to keep your client info safe.

✓ Find Your Device

Use location tracking to see exactly where your company devices are at any time.

✓ Secure Access

Ensure that only authorised staff can get into your sensitive company folders and emails.

What if a device is offline?

You can set instructions in advance. The moment that lost phone connects to WiFi or a mobile signal, it will automatically lock or wipe itself as per your command.

Work Life & Home Life, Neatly Separated

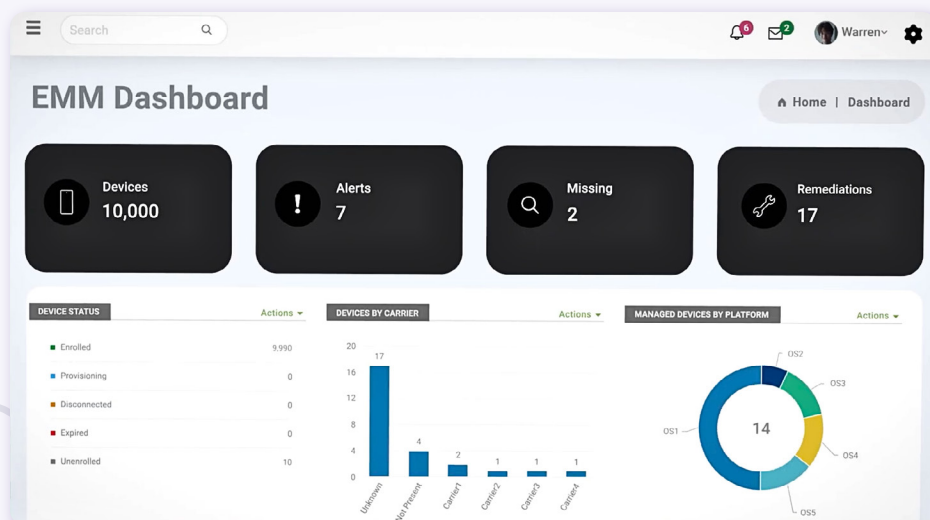

If your team uses their own phones for work, you might worry about privacy or what happens to your data if they leave. Our device management system solves this by creating a “secure work bubble” on their device.

✓ Better Security

You only see and manage work-related apps like Outlook or Teams. Their personal photos, messages, and private apps stay completely private.

✓ Boosted Productivity

If a staff member moves on or leaves the company, you can perform a **selective wipe**. This removes every bit of business data in seconds while leaving their personal files exactly as they are.

Testimonial

“

With Alfonica's help, we can now manage all our devices simply and securely. Samsung Knox gives us peace of mind that our residents' privacy is protected while our staff can focus on delivering the best care.

Beenstock Care Home

Customer Story

Since 1998, Blacks Visual has been a leading British company in retail design and manufacturing. With an international reach, the company serves clients worldwide.

Driven by a passion for creative design, quality production, and installation, Blacks Visual handles every project with care. The in-house design team and skilled UK-based factory team ensure complete control and visibility throughout all projects.

Challenge

Blacks Visual needed a reliable service to monitor staff devices. **Without a proper management in place**, it was harder to ensure security, efficiency, and consistency across their operations.

Solution

Alfonica enrolled Blacks Visual onto the **Maas360 mobile device management (MDM) platform**. This gave the company complete oversight of staff devices, enabling them to monitor usage, enforce security, and support efficient workflows.

Outcome

With Maas360 in place, Blacks Visual can now control and monitor all staff devices. This has improved productivity, enhanced security, and given the team the tools they need to work more effectively.

Alfonica made device management simple. With Maas360, we can monitor and control our team's devices easily, ensuring smooth operations and greater efficiency.

Is it difficult to set up?

Not at all. We use “Zero-Touch” technology, which means devices can be set up automatically before they even reach your employee.

Not sure where your risks are? Give us a call for a friendly, no-pressure chat. We can run a quick check of your current setup and show you exactly how to make your business more secure.

Does it work on laptops?

Yes. While many people think MDM is just for phones, it works perfectly on tablets and laptops too, whether they are Mac or Windows.
